Reach-in Refrigerator & Freezer

Model: GF-1 / GF-2 / GF-3 / GR-1 / GR-2 / GR-3

Description

Glacier reach-in refrigerators and freezers are designed to suit the needs of any business who requires optimal performance without sacrificing design.

The door is accented with high-quality brushed stainless steel, as well as the interior and exterior, to fit a variety of decors. Recessed door handles allow for clean styling and improved ergonomics. The door is field reversible. The heavy-duty compressor is bottom mounted for excellent efficiency and better cooling. Digital controls fine-tune the desired interior temperature. Self-closing doors provide added convenience and ease of use. Auto-defrosting provides lower energy costs and colder temperatures. Shelves can be adjusted or removed for flexibility and maintenance. Swivel casters allow the unit to be easily moved for cleaning.
