Height: 92½" (235cm)

The **Compact Pro** deck oven is the perfect choice for a successful restaurant with limited space. Use the compact pro as a primary oven for cooking pizza, or as a low consumption slice reheating oven.

For restaurants looking to offer gluten free pizzas, the smaller Compact Pro models can easily be added without a large space or resource commitment, while preventing cross contamination.

Available in five different sizes, the Compact Pro will suit any restaurant and become a part of the regular workflow. The Compact Pro is the ultimate small, practical, and powerful oven.

The compact pro comes with various deck sizes, including single and double decks, and can be installed with a 38.5" tall stainless steel oven stand (shown above).

Features:

- Maximum operating temperature of 842°F (450°C)
- Great for fresh and frozen bakery products
- Ideal for use as a dedicated gluten free oven
- Independent control of top and bottom heat
- Perfect heat distribution
- Thick fiberglass insulation to avoid heat dispersion
- Panoramic glass door and brightly lit interior
- Stainless steel façade
- Pyrometer for temperature control
- Safety thermostat
- Available stand
- Stackable up to four decks.
